

ALEX O'NIONS

PROGRAMMER

OBJECTIVE

To design and implement unique, engaging game mechanics while applying creative problem-solving and strong team collaboration. I aim to further develop my programming expertise to contribute to innovative and polished game experiences.

EXPERIENCE

ABERTAYS DARE ACADEMY FINALIST (2025)

May 2025 - Sep 2025

Dare Academy is a competition held by Abertay each year, where only 6 teams can be accepted to develop and showcase a game to people in the games industry. Development included strict deadlines, talks and feedback with professionals as well as strong communication within the team. Focused on Weapons and UI programming in Unreal Engine 5 and communication skills with a team of 8. Used C++ and Unreal's Blueprints. Worked within deadlines. Took professional feedback into account. Identified issues, analysed information and provided solutions to problems.

GAME MECHANICS -MESH CUTTING (3RD YEAR PROJECT)

Sep 2024 – Dec 2024

Created a mesh-cutting mechanic in Unreal Engine 5 using C++. Created for Game Mechanics modules in the 3rd Year of University. Use of procedural Meshes and C++ within Unreal. Worked within Deadlines.

PROFESSIONAL PROJECT (3RD YEAR UNIVERSITY)

Jan 2023 – May 2023

For this module in university, we had to work on an in-house game engine in C++, as well as on PS5 test kits. We had to build core logic like collision and physics, for the game we were creating. Unfortunately, due to an NDA I can't disclose more.

GAMES PROGRAMMING (1ST YEAR UNIVERSITY)

Jan 2023- May 2023

For a Module in University (Games Programming), we had to create a game using SFML, learning about sprites, animation, collisions, and entity management. This allowed me to gain a strong foundation in SFML for later use.

SKILLS

C#

C++

SFML, OpenGL, PS5

Unity

Unreal Engine 5 (UE5)

Game Development
Communication

EDUCATION

ABERTAY UNIVERSITY, 2022-2026

BSc, Computer Games
Applications Development

ABOUT ME

I thrive on building unique, fun games and building collaborative communities. From frequent participation in game jams to creative storytelling in Dungeons and Dragons, I keep my creativity alive while strengthening teamwork and communication skills.
